

PROFITSTARS® REMOTE DEPOSIT CAPTURE™ SOLUTION

Industry-leading RDC for institutions of every size

RDC has gained wide acceptance, but not all RDC solutions are created equal. Serving more financial institutions with Remote Deposit Capture than any other provider in the industry*, ProfitStars offers proven solutions to accommodate organizations of all types and sizes. As the experienced, recognized leader in RDC, we simply have the best solutions to offer any financial institution or organization.

Meet Alogent and EPS, the Best of the Best in RDC

ProfitStars' Alogent Deposit Automation Solutions are deployed at some of the largest, most sophisticated financial institutions in the world. These solutions provide exceptional scalability, usability, integration capabilities, and control to those financial institutions that prefer a solution tailored to their unique needs.

The Alogent commercial, retail, and mobile RDC solutions provide a complete, full-featured offering that allows financial institutions to acquire deposits, secure high-value client relationships, expand their geographic reach, and generate fee-based revenue. These solutions also allow institutions to embed RDC functionality into any online application, provide deposit review and approvals to help mitigate RDC risk, and enable multi-channel duplicate detection.

ProfitStars' Enterprise Payment Solutions (EPS) is a comprehensive payments engine that accepts a variety of payment types. EPS offers a robust suite of risk management tools and reporting capabilities for both the financial institution and the business. The EPS payments engine provides multiple touchpoints through which a business can process a wide variety of payments, including checks, ACH, and card transactions. The RDC engine is a complete solution that allows a business or consumer to deposit checks from any remote touchpoint – home, office, or on-the-go. Deposits can be made via a single or batch-feed scanner, compatible smartphone or tablet device, or flatbed scanner.

This flexible, scalable solution can be configured to offer as many or as few payment options as desired, while maintaining the flexibility to quickly and easily add more options when needed. For example, if you only want remote deposit capture and ACH now, you may add card processing or a hosted payment page for accepting online payments at a later date; it's simply a matter of enabling the feature.

EPS combines its unparalleled reporting and compliance tools with flexible workflow options, as well as the ability to integrate with remittance/lockbox and value-added reseller solutions.

Discover Why ProfitStars Leads the Way in RDC

ProfitStars' innovative RDC solutions from Alogent and EPS help streamline the deposit process, reduce labor and operating costs, and offer a powerful performance-boost to your institution's bottom line. Our feature-rich solutions allow financial institutions to deliver services that meet a diverse range of remote deposit needs – from high-volume commercial businesses to small companies and on-the-go individuals.
