OUR CORE SERVICES

REMOTE DEPOSIT

DepositNow!, BankServ's leading payment management solution for businesses of all sizes, enables safe, secure online deposits of paper checks and now features electronic invoicing along with options to accept online credit card and eCheck payments as well as mobile payments. DepositNow! is a revolutionary and unique product that is demonstrably different from any other desktop deposit solutions available to banks, and remains the only product to automate the accounting related to online deposits for QuickBooks® and Peachtree® users.

GFX SERVICE BUREAU: FEDWIRE & FOREIGN EXCHANGE

BankServ's revolutionary Global Funds Exchange® system, GFX, a sophisticated money transfer solution for financial institutions of all sizes, automates Fedwire transfers in a secure, reliable, and cost-effective environment. GFX offers small and mid-sized financial institutions the same capabilities as larger banks with an application that is easy to use, flexible and highly configurable to suit each bank's unique business needs. With GFX, your institution can quickly benefit from increased operational efficiency, guaranteed regulatory compliance and the highest levels of customer service. GFX is used today by over 115 U.S. Holding Companies and other financial institutions, representing more than 150 banks, thrifts, credit unions, trust companies, title companies and investment firms.

SWIFT SERVICE BUREAU

BankServ offers a fast, cost-effective entry to SWIFT through our SWIFT Service Bureau—a reliable, fully managed service enabling both new and existing members of SWIFT to send and receive financial messages in a trusted and secure environment. At the heart of BankServ's SWIFT Service Bureau is TurboSwift™, one of the world's leading SWIFT interfaces. TurboSwift™ allows users to send international messages regarding payments, foreign exchange, letters of credit and other files and data over a secure network trusted by financial institutions worldwide.

DepositNow!® desktop deposit

RECOGNIZED BY BOTH THE BANKING AND ACCOUNTING INDUSTRIES AS THE **BEST-IN-CLASS FOR SMALL BUSINESS**

DepositNow! is designed with the small businesses in mind and sets out to help businesses get paid faster and post receivables easier.

BankServ's desktop deposit system can help make your bank unique among your competitors and valuable to your small business customer base with its award-winning and patented technology that enables users to automatically update their accounts receivable in QuickBooks® or Peachtree® accounting systems in addition to handling the check deposit.

Quickly rolling out remote deposit to your customers is easy with DepositNow! BankServ takes care of the IT and scanner

fulfillment issues for your financial institution and handles all the check processing from our own secure data centers, certified by bank examiners and independent auditors. DepositNow! can be connected to your existing back-office system so that work is integrated with your other check processing applications to simplify archive storage and retrieval.

Today, over 50 banks resell DepositNow! to their client base and over 40,000 small businesses use DepositNow! to manage their daily receivables.

more than just remote deposit

AUTOMATED A/R UPDATING

- DepositNow! is designed for use with popular accounting software such as QuickBooks® and Peachtree®
- Accounting records are automatically updated as checks are scanned; DepositNow! matches check payments to the correct customer invoice and updates accounts receivable

HOSTED, ONLINE CARD AND ELECTRONIC CHECK PAYMENTS

- Offer multiple payment options, including electronic check and major credit card payments
- Create a custom-branded payment website and direct customers there to make payments
- Fast and efficient receivables posting into QuickBooks, Peachtree and industry-specific software

ACCEPT ALL FORMS OF PAYMENT WITH ONE SOLUTION...DEPOSITNOW!

SECURE E-MAIL INVOICING

- One-click creation of e-mail invoices in QuickBooks®; faster invoicing and payment through electronic delivery
- Insert a secure click-to-pay hyperlink within invoices to direct customers to your branded payment site
- Offer credit card and eCheck payment options to payors and allow scheduling of recurring payments

MOBILE PAYMENTS

- Process credit card and check payments anytime, anywhere with BankServ's Mobilescape® terminal—a lightweight, portable, handheld wireless device
- Access real-time reports for transactions conducted in the field & manage accounts from any computer with an Internet connection

WHO IS BANKSERV?

Founded in 1996, privately-held BankServ is headquartered in San Francisco and works with more than 450 banks in 53 countries. BankServ has emerged as a leading developer of innovative electronic payment and financial messaging solutions, and provides world-class service bureau processing to banks and corporates for Fedwire, Foreign Exchange, SWIFT, remote deposit and accepting bill payments for mortgages, credit cards and other consumer debts over the Internet.

Using BankServ's feature-rich products, regional and large community banks can compete on a multinational level without having to worry about supporting the sophisticated IT infrastructure that underlies the products they need. BankServ handles millions of transactions every month for its clients and has a reputation for sophistication, high security and high up-time reliability. No matter where in the world money needs to go, banks can depend on BankServ, the worldwide experts in electronic payments.
