

With the passing of the Check Clearing for the 21st Century Act (Check 21 Act) in 2004, banks were enabled to process checks electronically. Enter Skyline's DirectFED's patented Remote Deposit Capture System.

Scan to Deposit in Just Three Steps

With our software, you can scan up to 250 checks at a time, front-to-back. DirectFED Deposit is PC-based and works with most scanners, including Paninis. We utilize Magnetic Ink Character Recognition (MICR) combined with the power of Optical Character Recognition (OCR) to pull routing and account numbers, check number, and check amount. Once you verify all these amounts, you're one click away from completion—we do the rest! We consolidate your deposit file and send it to the Federal Reserve or your deposit bank for clearing. Within just 12 hours, the funds get deposited to your account.

Easy Reporting

Our extensive reporting and archiving is available locally via your workstation if you are operating in a stand-alone environment. If you are operating in a network environment, reporting and archiving can be set up to be made available either locally or enterprise-wide, depending on your business requirements. Specify a range of items and generate a printable report, or save as a PDF. Also review the check image archive, whenever you need it.

Process Pay Stubs with your Checks at the Same Time

Our software can read both checks and remittance stubs when scanned together. Process up to six items as a unit, storing them in a digital "envelope". Refer to specific envelopes later in the desktop lockbox.

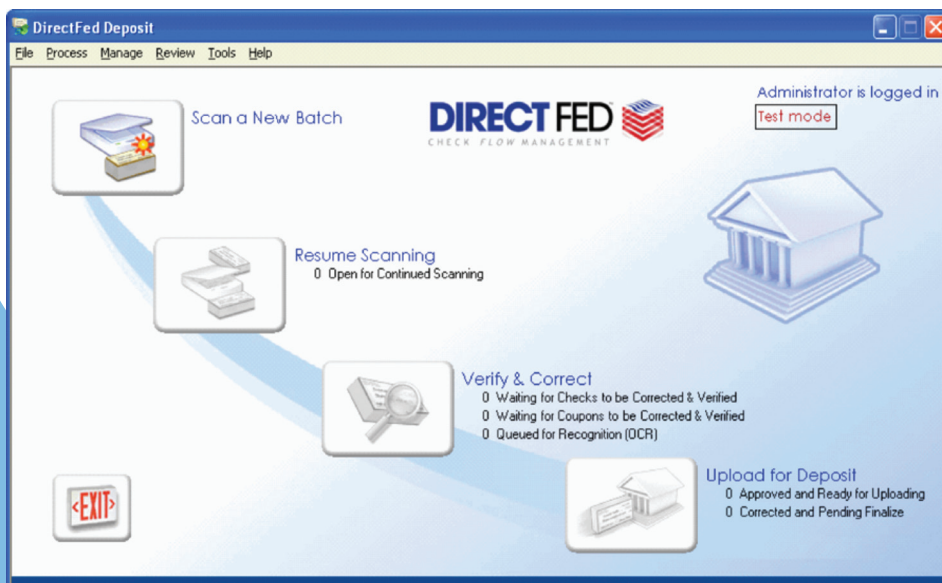

Benefits

- › Compatible with most scanners, including Paninis
- › Scan up to 250 items in a batch
- › Handles multiple banks and bank accounts
- › Deposits posted to your account within 12 hours
- › Low end-to-end fees
- › Train in just 30 minutes
- › Customer support on-call 24/7

Industry Solutions

- › Banking & Credit Unions
- › Independent Sales Organizations (ISOs)
- › Government & Public Works
- › Non-profit Organizations
- › Merchants & Business
- › Property Management

Our simple 1-2-3 interface

Generate Returns with One Click

Process image inclearing checks and return files from the Federal Reserve. Generate the output for your core item processor right from your desktop lockbox. With one click, you can generate an image return cash letter and send to the Federal Reserve.

Go Green with DirectFED

Move your green initiative forward by going paperless. It is estimated that over 1.3 million tons of CO₂ is emitted as a result of just the transport of paper bills and payments. By using our Remote Deposit Capture system, you'll not only eliminate the cost of armored cars and courier transport, but you'll reduce your carbon footprint as well.

Set up your scanning station anywhere you need it.

About Skyline's DirectFED

DirectFED Payment Solutions was founded as Skyline's DirectFED in 2004 as the first business-centric processor performing Remote Deposit Capture for a wide range of companies and organizations. Our goals for customers of our patented suite of products are to optimize float to their advantage, reduce bank fees and provide significant back-office savings by using the new laws and technology to their advantage.
