

Don't Use Remote Deposit Capture? Skyline's DirectFED Offers More

What is Remote Deposit Capture (RDC)?

RDC is the process through which a business, non-profit or government entity can deposit paper checks into their bank accounts right from their office. Checks are scanned through a check reader and converted to electronic images which are deposited into your bank account through the internet. No trip to the branch.

A scanner and computer are all you need to start!

Why Choose Skyline's DirectFED Payment Solutions

Skyline's DirectFED is the leader and pioneer in advanced Check 21 technology. We processed the first check image in 2004, the year the Check 21 law took effect.

In addition to serving the business world, we use our patent-issued technology to serve banks, credit unions and other financial institutions. We have processed over 8 million checks, totaling more than \$6 billion in transactions.

At just a starting cost of \$0.25 per check, we can have you up and running in less than a week. (Volume prices also available).

What This Means for You

- › No need to send staff to go to the bank to make a deposit. No wasted time or transportation costs!
- › Overnight clearing of funds to your bank account. Faster settlement of funds means better cash flow and reduced float charges from your bank.
- › Less work preparing deposits.
- › Bank deposit fees substantially reduced.
- › Deposits can be made any time, day or night. No daily race to the bank.

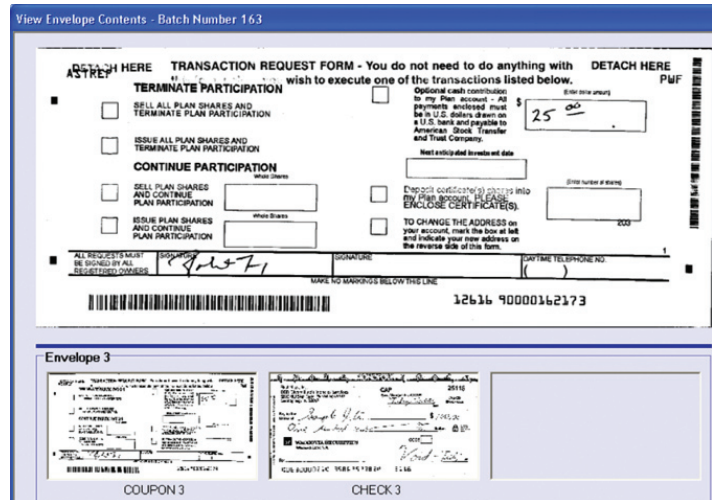

Our simple 1-2-3 interface

Have RDC already? Why Skyline's DirectFED is Superior

What is Remote Deposit Capture (RDC)?

Not all RDC solutions and systems are the same. There are significant benefits to switching to DirectFED from your current system.

- › The highest accuracy rate in the industry allows you to work faster, with minimal manual corrections.
- › Easy-to-use software – training in just 30 minutes.
- › Can read and export payment coupon data along with checks.
- › Integrates into your own accounting software. All scanned data can feed into your existing system.
- › One interface for both processing and reporting.
- › Competitive pricing. Both per-item and volume pricing plans available.
- › Secure digital storage of all your customer check images, as well as any coupons or payment stubs.
- › Offline back-up storage for seven years.
- › Freedom to change banks without switching RDC systems.
- › Simultaneously use multiple banks and multiple bank accounts through one system.
- › Single location or multiple location capability.
- › Scan up to 180 items front-to-back per minute, up to 250 per batch.
- › Centrally manage user accounts, which improves security, accountability and audit functions.
- › Significantly reduce NSFs with top-rated check verification system, integrated with Intuit's NCN network.
- › We also offer a mobile version of our RDC software, DirectFED MobileTM powered by Mitek, for Blackberry[®], iPhone[®] and Windows Mobile[®] phones.

Our desktop lockbox interface keeps your checks and pay stubs organized in "digital envelopes".

Why Desktop Software is More Efficient Than Internet Processing

- › All scanning and corrections are processed "offline." Upload to the Internet at your convenience.
- › Fastest scanning – no Internet connection to bog down with excess data.
- › Temporary Internet failures don't shut down your scanning operation.
- › Reduces exposure to Internet fraud.
