

Now Fraudsters Play by Your Rules

And Payments Become More Reliable

With ETran's Proactive Payment Monitor (PPM) from FTNI, you can change your position in the fraud and risk arena: You make your business rules, and the fraudsters lose.

- ▶ Monitor payment activity and take action on payments before they become deposits.
- ▶ Implement customizable deposit thresholds.
- ▶ Identify and suspend questionable payments while sending real-time alerts to both the merchant and the financial institution.
- ▶ Create individual monitoring rules for checks, ACH and credit card transactions.

Plus, PPM assimilates seamlessly with FTNI's modular ETran Platform, a PCI-compliant, SaaS solution that requires no additional software and integrates into a variety of back-office systems.
