

A Check Scanner Reseller and Deployment Service Provider.

TASQ Technology is one of the largest providers of Point of Sale (POS) equipment and services in North America. For over a decade, TASQ has been known as a premier one-source solution for Deployment, Call Center Services and Supplies. Our high-quality, single-source solutions and progressive end-to-end service offerings set us apart from the competition, enabling us to provide our customers - Financial Institutions and ISO's alike - with all of the equipment, support and service necessary to be successful.

TASQ remains in the forefront of providing the latest technology to bank clients in need of product solutions for Remote Deposit Capture (RDC), a service that allows electronic check scanning and transmission for posting and clearing.

As Financial Institutions adopt one of the most important developments the U.S. Banking Industry has seen in years, TASQ provides the high-quality, reliable scanning devices and customer support necessary to make the transition for each client a success.

Deployment

TASQ provides check scanner equipment through a variety of purchase, rental and lease options. Our just-in-time inventory services allow customers to eliminate upfront inventory investment and equipment management. Our expansive inventory selection affords our customers the ability to order from multiple equipment options. Plus our multiple locations and redundant

inventory systems help ensure supply and business continuity.

We have a variety of programs to suit your needs including equipment retrieval, repair, warranty management and revenue sharing.

We repair tens of thousands of units each month under the highest quality control standards. We can manage the retrieval of broken or obsolete check scanning equipment with outbound calls and reporting.

Our TASQWebSM proprietary software system is the preeminent merchant management system, offering customers advanced features such as all-inclusive reporting, real-time order history, tracking information, order editing and control, and multiple security levels. Because of the business-enhancing features that make up the TASQWebSM system, you and your staff have the ability to make queries and print numerous deployment and inventory reports

including order status, shipping results, inventory levels, repair activity and call tag retrieval status. You also receive nightly reporting on the day's activity.

Call Center

Our full service Call Center continues to grow, not only in size, but also in functionality to successfully meet the ever-evolving needs of our clients. Current volume exceeds one million calls per year. TASQ is an industry leader for knowledge and superior support and specializes in taking calls directly from merchants or clients on our customer's behalf.

Call Center services include:

Technical Help Desk supporting various hardware types and software applications.

Telephone Training includes automatic setup upon deployment on an as needed basis and handles customized scripts, merchant training and help with software applications.

Supplies

With TASQ's comprehensive supply order service, you don't need to worry about finding yet another source for your supply fulfillment needs. Our comprehensive supply program includes electronic order entry via the TASQWebSM system, just-in-time supply ordering, increased service levels, real time merchant histories, 1 to 3 day guaranteed deliveries, comprehensive management reporting and an optional TASQ merchant-direct order desk.

We handle the majority of POS supplies and accessories including ink jet cartridges. Customers receive competitive pricing and optional billing methods. For customers looking to build additional revenue models,

TASQ has a revenue sharing program that enables you to receive additional profits.

Let TASQ work for you.

All businesses like yours that handle electronic payment processing or data collection, regardless of size, can utilize TASQ for any or all of your payment transaction needs, allowing you to focus on what you do best – operate and grow your core business.

TASQ Technology remains committed to the original principles, expertise and core values that have made us so successful over the past decade. It is this foundation that allows us to provide the banking industry with first-to-market solutions that help increase your business and profitability.
